Project Trainee   Nov 2022 - Jan 2023
Mahindra   *Nashik, India*

- Online data mapping from Nash spot weld parameter software to PLC interface.
- Automated Communication between Mysql and Excel

PROFESSIONAL PROJECTS

❖ **Insurance Application (CRM) -**

This ongoing project involves developing a CRM module for an insurance application. Our roles included developing the UI and API for the CRM module.

- Technologies and Tools Used :

- UI: Angular
- API: Spring Boot
- Database: MySQL

❖ **Reflector -**

"Reflector" was a web application platform deployed on Cloud, providing users access to their Shadow and Edge Hub devices. It served as a centralized hub for managing and interacting with connected devices. Played main role in developing the middleware for the platform ,enabling efficient communication between users and their devices.

- Technologies and Tools Used :

- UI: Angular
- API: Node.js
- Database: MySQL

- ❖ **Edgehub and Shadow -**

For "Edgehub" and "Shadow," we developed software for data collection and remote access, integrating Modbus and MQTT configuration. Built UI with Vue.js and API using C++

- Technologies and Tools Used :

- Operating System: Linux
- UI: Vue.js
- API: C++, Macchina.io Edge, Poco, Node.js
- Database:SQLite
- Protocols: MQTT

SKILLS

Proficient	Angular, Node Js, JAVA, Mysql
Known	React, VueJs , GitLab, Spring Boot ,C++

EDUCATION

B.E. (Electronics and Telecommunication), NDMVP's Karamveer adv. BaburaoGanpatraoThakare college of Engineering, Nashik 2019 - 2023
CGPA :- 7.1

AWARDS/ACHIEVEMENT'S

- **Employee of the Month Award**: Recognized for performance and dedication, successfully managing three projects simultaneously while maintaining work standards.
